

INSTALLATION · REPAIR · SERVICING

Air conditioning for London homes

Cool, comfortable rooms all summer, and heating too with many systems. We size and install wall-mounted air conditioning, and repair and service the systems you already have.

- ✓ Refcom F-Gas company certificate
- ✓ Sized for the room
- ✓ Repairs and annual servicing

OVERVIEW

Air conditioning

We install wall-mounted air conditioning in homes across London and Greater London. Every installation starts with the same questions: what the room is used for, how much sun it gets, and where the indoor and outdoor units will go.

We hold a Refcom F-Gas company certificate covering air conditioning and heat pump systems of any size, so the same team can repair and service your system for years to come. For offices, shops and larger buildings, see our commercial brochure.

Cooling and heating

Many systems can heat as well as cool. Tell us which you want and we show you the right option.

Neat installation

Outdoor units on the floor, low on the wall or high up; indoor units on an outside wall or with pipework in neat trunking.

Certified engineers

By law, work on systems that contain refrigerant gas must be done by F-Gas certified engineers.

Kept running

Annual maintenance, cleaning filters and checking the system, helps it cool properly and spots faults early.

Repairs and servicing we handle

- Not cooling enough: filters, a blocked outdoor unit, fans, compressors or low refrigerant
- Water leaking indoors: blocked condensate drains or frozen coils
- Rattles, grinding and other strange noises
- Bad smells from dirty filters or coils
- Error codes and units that will not start
- Ice on the pipes and refrigerant leak finding

Older R22 systems

Systems that use R22 refrigerant cannot be topped up any more because the gas has been phased out, so they are normally replaced rather than repaired. Ask us about a replacement.

HOW IT WORKS

From first contact to aftercare

01

Tell us about the room

Size, sun, what it is used for and where the units could go. The online quote covers one room; call us for more.

02

Recommended size

A rule-of-thumb size from your answers, which we confirm before installing.

03

Installation

Indoor and outdoor units fitted, with pipework through the wall or in neat trunking.

04

Commissioning

The system is tested and set up, and we show you how to use it.

05

Servicing and repairs

Book annual servicing or a repair from the same booking form as boilers and heat pumps.

Areas we cover

Based in Barnet, North London, working across London and Greater London.

North & Central: City of London, Westminster, Camden, Islington, Barnet, Enfield, Haringey

East: Hackney, Tower Hamlets, Newham, Waltham Forest, Redbridge, Havering, Barking and Dagenham

South: Southwark, Lambeth, Lewisham, Greenwich, Bexley, Bromley, Croydon, Sutton, Merton, Wandsworth

West: Kensington and Chelsea, Hammersmith and Fulham, Ealing, Brent, Harrow, Hillingdon, Hounslow, Richmond upon Thames, Kingston upon Thames

Accreditations

- Refcom F-Gas company certificate
- RECC member

"The air conditioning installation experience was excellent. The team was exceptionally clean, maintaining a professional and polite demeanor throughout."

Rosa De Lope · Google review

Can air conditioning heat as well as cool?

Many systems can. The quote asks whether you want cooling only or heating as well.

Can you quote for more than one room?

The online quote covers one room. For more rooms, call us on 0330 133 1626.

Why is my air conditioner not cooling?

Common causes are blocked filters, a dirty outdoor unit and low refrigerant from a leak, which only an F-Gas certified engineer may fix.

Engineer-checked

A qualified Heatmaster engineer reviews every job. If something is unclear, we ask rather than guess.

Explained first

You are told what is needed, and why, before any work goes ahead.

Local to London

Based in Barnet, North London, with engineers working across every London borough.
