OVERVIEW

Commercial heating and cooling

We design, install and maintain commercial heating and cooling: VRF and heat recovery systems for multi-zone buildings, air source heat pumps for heating and hot water, air conditioning, chillers and commercial boilers. We work with Toshiba, Daikin and Mitsubishi Electric systems.

Projects range from a single heat pump replacing a boiler to multi-zone VRF across a whole school. Commercial work is priced after a site survey, and service agreements keep systems checked before winter and summer.

Multi-zone comfort

VRF with heat recovery lets different zones heat and cool independently.

Lower-carbon heating

Commercial air source heat pumps can replace gas boilers for heating and hot water.

One team, start to finish

Survey, specification, installation, commissioning and handover by the same company.

Planned maintenance

Service agreements so heating and cooling are checked before each season.

What we install and maintain

- VRF and heat recovery systems
- Commercial air source heat pumps, surveys, servicing and repairs
- Commercial air conditioning
- Chillers and fan coil systems
- Commercial boilers and heating systems
- Cold rooms, walk-in chillers and freezers (see our cold rooms brochure)

RECENT PROJECTS

EDUCATION

Elthorne Park High School

Four independent VRF systems with heat recovery. Eight roof-mounted outdoor units serve 72 classroom zones.

RESIDENTIAL DEVELOPMENT

Westheath Place, Golders Green

Heat recovery VRF retrofit with twelve independently controlled ducted zones.

RELIGIOUS BUILDING

Christ the King Church

Boiler replaced with a low-noise air source heat pump for heating and hot water, with separate zones for the church and adjoining spaces.

HOW IT WORKS

From first contact to aftercare

01
Site survey
We look at the building, how it is used, the existing plant and where new plant can go.

02
Specification and design
System type, zones and controls are agreed and priced from the survey.

03
Installation
Our engineers install the plant, pipework and controls, working around your building's use.

04
Commissioning and handover
Systems are tested and commissioned, and your team is shown how to run them.

05
Planned maintenance
Service agreements and repairs for heating, cooling and refrigeration plant.

Areas we cover

Based in Barnet, North London, working across London and Greater London.

North & Central: City of London, Westminster, Camden, Islington, Barnet, Enfield, Haringey

East: Hackney, Tower Hamlets, Newham, Waltham Forest, Redbridge, Havering, Barking and Dagenham

South: Southwark, Lambeth, Lewisham, Greenwich, Bexley, Bromley, Croydon, Sutton, Merton, Wandsworth

West: Kensington and Chelsea, Hammersmith and Fulham, Ealing, Brent, Harrow, Hillingdon, Hounslow, Richmond upon Thames, Kingston upon Thames

Accreditations

- Gas Safe registered
- MCS certified
- Refcom F-Gas company certificate
- RECC member

Read every review on Google and Trustpilot, linked from heatmasterlondon.co.uk/reviews/.

Which buildings do you work on?
Offices, schools, churches, shops, hotels, residential developments and other non-domestic buildings.

How is commercial work priced?
After a site survey, rather than through the online quote.

Do you offer maintenance agreements?
Yes. Service agreements and planned maintenance are available for commercial heating and cooling.

Engineer-checked
A qualified Heatmaster engineer reviews every job. If something is unclear, we ask rather than guess.

Explained first
You are told what is needed, and why, before any work goes ahead.

Local to London
Based in Barnet, North London, with engineers working across every London borough.
